***Acknowledgement***

Receipt is acknowledged of the Amendment filed December 02, 2005.

***Reasons for Allowance***

Claims 1-17 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Sprague et al., taken alone or in combination of other references, does not teach or fairly suggest a method or a register comprising, among other things, an output stage driving an output node, said output stage comprising a second pull-up device and a third pull-down device both responsive to said pre-charged node and a third pull-up device and a fourth pull-down device both responsive to said second preliminary output node (claim 1); an output circuit, having a first input coupled to said first node, a second input coupled to said third node and an output coupled to an output node, that drives said output node high if said first or third nodes are low and that drives said output node low if said first and third nodes are both high (claim 7); and driving an output node based on the states of the first and third nodes, wherein the output node is driven by an output stage, and wherein the output stage comprises a first pull-up device and a first pull-down device, both responsive to the first node, and second pull-up device and a second pull-down device, both responsive to the third node (claim 12), as set forth in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
